

I fully support the well founded Comment submitted by The American Radio Relay League (ARRL) concerning Docket ET 03-104. I also conclude the comments made by proponents of Broadband over Power Line (BPL) have little if any credible scientific data to support approval of this docket at this time. Further research and innovations in BPL will be needed to avoid the great risk this innovative technology will not cause irreparable interference to services licensed to operate in the 2 MHz - 80 MHz frequency range. Approval of ET 03-104 would violate the existing FCC rules on non-interference and would be contrary to the best interest of the public. As a Licenced Radio Amateur, I have worked hard to meet the necessary requirements to obtain my license and would hate to see something like BPL destroy all that I have worked for.
